## October 2013 Newsletter

The weather was not looking good for our fly-in breakfast. Even the afternoon before, there was a violent electrical storm. Gradually, the good news in the weather reports firmed up by Friday evening with a prediction of scattered clouds at 3500' and wind at 14 knots from the south-east.

As the morning wore on, this turned out to be a pretty good forecast except the wind was closer to 20 knots for the departures with the classic Straddie wing-flick being evident in many take-offs.

Numbers were down again, but we had a nice comfortable crowd of twenty-two aircraft fly in and served thirty-seven breakfasts.

The breakfast was excellent as usual. Pat and the volunteers worked very hard and we thank them and all the visitors who assisted in some way very much. Alan and Paolina flew up from Heck Field as they often do, to assist with the clearing up.

Our photographer over many years, David Wilson is having his big birthday, his “fiftieth” on the 5<sup>th</sup> of November. The Club wishes him all the best and would like to say how much we appreciate his photographic skills and the effort he puts into making us and our planes look great.

All members please note that the Straddie Aero Club AGM will be held at 10.30a.m. straight after the November breakfast.
